

Avaye Dawadi

Atlanta, GA | 470-265-8592 | adawadi6@gatech.edu | linkedin.com/in/avaye-dawadi/ | U.S. Citizen

EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science

Threads: Intelligence (AI, ML), Computer Systems and Architecture

Atlanta, GA

4.00 GPA - December 2025

Technical University of Berlin

Georgia Tech Exchange Program

Coursework: Machine Learning, Database Systems (SQL), Computer Networking (C/Assembly), Data Structures and Algorithms (Java), Computer Systems (C/Assembly), Intro to OOP (Java)

Berlin, Germany

May. 2023 – Aug. 2023

EXPERIENCE

Incoming Data Engineering Intern

State Farm - Financial Operations

Student Researcher

Embedded Pervasive Lab

Summer 2024

Dunwoody, GA

November 2023 – Present

Atlanta, GA

- Researching resource scheduling on Kubernetes clusters to optimize CPU utilization in deployment environments
- Developing methods for testing and improving CPU tail-latency on web and machine learning workloads
- Testing methods for reducing Redis end-to-end latency on Georgia Tech compute clusters via Mementier

Software Engineer Intern

Georgia Tech Research Institute - Robotarium

June 2022 – Present

Atlanta, GA

- Implemented optimizations on Python/MATLAB backend for nearly 50% faster robotics simulation load times
- Built a reactive web platform (Flask) for student robotics simulations for roughly 30 schools around rural Georgia
- Executed data collection algorithms in Python to meet audit requirements for \$200,000 legislature-funded project
- Deployed Docker image onto AWS EC2 instance (Ubuntu) that handles swarm robotics load for over 600 users

Engineering Manager

Georgia Tech Bits of Good - A Hack4Impact Chapter

Jan. 2023 – Present

Atlanta, GA

- Managed team of 4 developers to create a management and report generation system for environmental standards
- Revamped Azure deployment deployment cycles and converted all servers to serverless reducing costs by 40%
- Debugged React and NodeJS code and helped fix Azure deployment issues on 3 different deployment envs

PROJECTS

Exploratory Web Browser - Idea To Prototype | Python (OpenAI), Electron.js, React

July 2023 – Present

- Pioneered a browser that uses AI generated maps and graphs to promote research-specific exploration on the web
- Employed ML driven map algorithms to accelerate web query generation and research exploration by 35%
- Accepted to Georgia Tech I2P startup incubator with a \$500 grant to pursue a novel idea in product development

Deep Learning Playground | Python, Flask, React, AWS, TensorFlow

July 2022 – January 2023

- Programmed on the Georgia Tech Data Science Club's Deep Learning Playground at datasciencegt-dlp.com
- Instituted specific hyperparameter tuning features to increase machine learning development efficiency by 20%
- Spearheaded completion of an NLP sentiment analysis portion of the website for 250+ users training NLP models
- Managed 10+ other developers and assisted junior developers with debugging and ideation as needed

Earthcraft - southface.netlify.app | Next.js, MongoDB, React, Docker

May 2023 – Present

- Organized weekly meetings with client (Southface) to get feedback on changes to improve client efficiency by 60%
- Implemented automatic user provisioning in Salesforce so users could create reports for construction workers
- Manged CI/CD tooling using Docker to improve deployment efficiency to Netlify and Microsoft Azure

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, Node.js, TypeScript, Assembly, HTML5, SQL

Technologies: React, Angular, Flask, mySQL, Postgres, MongoDB, OpenCV, TensorFlow, PyTorch, ExpressJS, JIRA, Confluence, Numpy, Pandas, Matplotlib, Scikit-learn, Next.js, Vercel, React Native, jQuery

Developer Tools: Git, Docker, CI/CD (Travis, Jenkins, etc.) Google Cloud Platform, AWS, Microsoft Azure, Kubernetes, Firebase, Linux (Ubuntu, Debian, Arch)
