

Avaye Dawadi

Atlanta, GA | 470-265-8592 | adawadi6@gatech.edu | linkedin.com/in/avaye-dawadi/ | avaye.netlify.app | U.S. Citizen

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science, Minor in Fintech - 3.96 GPA

December 2025

Threads: Intelligence (AI, ML), Computer Systems and Architecture

Coursework: Machine Learning, Advanced Operating Systems, Database Systems (SQL), Computer Networking (C/Assembly), Data Structures and Algorithms (Java), Computer Systems (C/Assembly), Intro to OOP (Java)

EXPERIENCE

Software Engineering Intern

May 2025 - August 2025

Ramp - 8VC Fellow

New York City, NY

- Pioneered agentic AI workflows for travel bookings and servicing as part of the Ramp Travel team
- Led model migrations to enable admin flagging of off-platform travel bookings, improving capture rates 20%
- Solved customer incidents for 3 customers and worked with cross-functional partners to close out issues

Software Engineering Intern

Aug 2024 - Dec 2024

Intential - Network Automation Startup - Raised >\$29,000,000 dollars

Atlanta, GA

- Configured external APIs to work with network adapter builder via automated checks of security, IDs, etc.
- Spearheaded development of proper auth checking on compliance checker of networking adapters (e.g. Nokia)
- Built out new product to facilitate ~ 10% greater speed in building new network adapters for external APIs

Data Engineering Intern

May 2024 - August 2024

State Farm - Financial Operations

Dunwoody, GA

- Developed ML models on AWS Sagemaker to reduce unnecessary claim loss reserves by up to 15%
- Deployed proper data warehousing and data marts to AWS Redshift to increase querying efficiency by up to 30%
- Implemented time series models (ARIMA, UCM, etc.) to forecast necessary premium costs on a zip code basis

Associate Director of Engineering

Jan. 2023 – Present

Georgia Tech Bits of Good - A Hack4Impact Chapter

Atlanta, GA

- Managing 10+ projects across different tech stacks for various Atlanta-area non-profits.
- Revamped Azure deployment cycles and converted all servers to serverless reducing costs by 40%
- Debugged React and NodeJS code and helped fix Azure deployment issues on 3 different deployment envs

Software Engineer Intern

June 2022 – May 2025

Georgia Tech Research Institute - Robotarium

Atlanta, GA

- **Publication (ASEE):** Creating Hardware-Accessible Learning with the Robotarium and Block Coding
- Implemented optimizations on Python (Flask)/MATLAB backend for 50% faster robotics simulation load times
- Deployed Docker image onto AWS EC2 instance (Ubuntu) that handles swarm robotics load for over 600 users

PROJECTS

Exploratory Web Browser - Idea To Prototype | Python (OpenAI), Electron.js, React

July 2023 – Present

- Pioneered a browser that uses AI generated maps and graphs to promote research-specific exploration on the web
- Employed ML driven map algorithms to accelerate web query generation and research exploration by 35%
- Building through GT I2P incubator (\$500 grant) and Buildspace, got to YCombinator interview stage for S24
- After MANY pivots, currently in alpha testing, reach out at blossom-app.com if interested!

xv6 Operating System | x86 Assembly, C

January 2024 – December 2024

- Created kernel and user level processes to add modifications to the xv6 operating system
- Implemented copy-on-write forking and lazy zero page allocation to increase effective memory by 30%
- Worked on optimizing round-robin scheduling algorithm to increase efficiency of process scheduling

TECHNICAL SKILLS

Languages: Java, Python, C, C++, C#, JavaScript, Node.js, TypeScript, Assembly, HTML5, SQL, Go

Technologies: React, Angular, Flask, MySQL, Postgres, MongoDB, OpenCV, TensorFlow, PyTorch, ExpressJS, JIRA, Confluence, Numpy, Pandas, Matplotlib, Scikit-learn, Next.js, Vercel, React Native, jQuery

Developer Tools: Git, Docker, CI/CD (Travis, Jenkins, etc.) Google Cloud Platform, AWS, Microsoft Azure, Kubernetes, Firebase, Linux (Ubuntu, Debian, Arch)
